

MTP Deployment Procedures for WCS, WESB, CTO/VM and OMS:

During MTP, Please Follow the below steps:

1. Model Copy job disable & HP folder Removal (Patches get deleted after deployment)
2. DB Backup
3. EAR Backup
4. Pre-Deployment activities (if any)
5. Maintenance page Enable (If approval)
6. Deployment (WCS, WESB, OMS, CTO/VM)
7. Maintenance page Disable (If approval)
8. Post- (if any)
9. Hotfix Patches Deployment activities (if any)
10. QA signoff

Step 1: Model copy job disable & HP Folder Removal:

Do remove the HP folder before start of Deployment

HP folder location:

Stager: /opt/apps/IBM/WebSphere/AppServer/profiles/ETRSTAGE/installedApps/WC_ETRSTAGE_cell/WC_ETRSTAGE.ear/Stores.war/WEB-INF/classes/com

Live: /opt/apps/IBM/WebSphere/AppServer/profiles/ETRLIVE/installedApps/WC_ETRLIVE_cell/WC_ETRLIVE.ear/Stores.war/WEB-INF/classes/com

#####

Step 2: DB Backup:

Need to back up the DB for the respective deployment (WCS, WESB, CTO/VM and OMS)

For Stager:

Send this below DB details to GDBA team (*for respective deployments*):

- WCSEPC, CAEPROP, VMEPROP

Note*: Kindly request to exclude "BUSAUDIT" table

For Live:

Send this below DB details to GDBA team (*for respective deployments*):

- WCSPC, WESBPC, SSFPC, CAPROP

Note*: Kindly request to exclude "BUSAUDIT" table

#####

Step 3: EAR Backup:

Need to take EAR backup for the respective deployment (WCS, WESB, CTO/VM and OMS)

Note: While taking backup please have build package name in the backup file name as naming convention for both DB & File system backups.

Location: /opt/apps/

Backup folder: IBM

Sample file name for WCS: IBM_wcs_t_r46526_08Feb2015_R3.2.0_223.tar.gz

Sample Create backup:

```
nohup tar --ignore-failed-read -czvf test.tar.gz test &
```

Sample Restore backup:

```
nohup tar --ignore-failed-read -xzf test.tar.gz test &
```

Step 4: Pre-Deployment activities (if any):

A	B	C	D	E	F
Application	SQL/ Instruction	Functionality	Owner	SQL Statement Details	Environment
WCS	SQL	Features Tab Espots	Venmathi/Abimanyu	INSERT INTO DMELETEMPLATE (DMELETEMPLATE_ID, STOREENT_ID, DMELEMENTTYPE_ID, NAME, IMPLX	Prod Stage
WCS	SQL	ESD	Pradeep	UPDATE shpmodedsc SET FIELD1='Standard 3-5 Business Day' WHERE SHIPMODE_ID IN (select SHIPMOD	Prod Stage
WCS	SQL	Model Search On/OFF	Abimanyu/Venmathi	INSERT INTO STORECONF (STOREENT_ID,NAME,VALUE) Values (10151,'MODEL_SEARCH_SWITCH','1');	Prod Stage & Prod Live
WCS	SQL	SEOCANONICAL - Table	Karthick Sethuraman	insert into STGMERTAB(tabnbr,tabname) values ((select max(tabnbr)+1 from stgmertab),'seocanonical');	Prod Stage and Prod Live
WCS	SQL	SEOCANONICAL - Triggers	Karthick Sethuraman	-----TRIGGERS FOR SEOCANONICAL -----	Prod Stage
WCS	SQL	Financial distribution req	Prathima	ALTER TABLE xorder ADD PROMOTIONALDISTRIBUTION varchar2(50);ALTER TABLE xorderitems ADD FIE	Prod Stage and Prod Live
OMS	SQL	Call center Agent Reset	radhika.arunachalam@hp.c	Step 1:- Run sql in OMS DB. update yfs_user set pwd_policy_key = (select pwd_policy_key from plt_pwd	Prod Live
Call Cer	SQL	Call Center - Configurati	radhika.arunachalam@hp.c	Please execute the below SQL filesCREATE INDEX XHPEPPCOMPANY_CIC_I ON XHP_EPP_COMPANY (CIC	Prod Stage and Prod Live
WCS	SQL	Bundles/Content	Dhanalakshmi/Prathima	drop table xorderkit;drop table xorderitemskit;drop table xorderitemskitadj;create table xorderkit(orders	Prod Stage and Prod Live
WCS	Instruction	UI - Static Images	Vengatesan Mohan	As per 3.2 user story we added few static images, that needs to moved to PROD Stage & Live environmen	Prod Stage & Prod Live
WCS	Instruction	UI - Static Images	Vengatesan Mohan	As per 3.2 user story we added few static images, that needs to moved to PROD Stage & Live environmen	Prod Stage & Prod Live
OMS	Instruction	New Queue	priyadharshini.k@hp.com	New Queue to be created : SSFS_ORDER_STATUS_Q	Prod Live
WCS	Instruction	UI - Static Images	Vengatesan Mohan	As per 3.2 user story we added few static images, that needs to moved to PROD Stage & Live environmen	Prod Stage & Prod Live
				CTO Color Swatch Configuration, Click the link for guidance document	
				create an object cache instance with name services/cache/SwatchMapCache in Extended cache monitor to cache the swatch	
WCS	Instruction	CTO color swatches	Kavya/Prathima	images.	Prod Stage & Prod Live
WCS	Instruction	REVERSE FEED	Prathima	Reverse Feed Configuration	Prod Live
OMS	Instruction	Agent Server - Daemon	Ramya Ramamurthy	There are 4 Java processes are running for each agent server in PROD Agent BOX. So please kill the Daemon processes manually before the deployment starts.	Prod Live

Above is the example of pre-deployment steps like SQL, Certificate Update, Instructions (Please do those before start of deployments)

#####

Step 5: Maintenance page Enable:

Whenever there is an APAR installation / Client (or Leadership) approval, please enable the Maintenance Page for **both Estore & Mstore** , when start of Deployment.

Procedure:

Go to Akamai link: <https://control.akamai.com>

Navigate to → **Configure-> cloudletsPolicyManger-> Activate Policies**

Cloudlets Policy Manager

Policies

Activate Policies Add New Policy

Create and manage the different Cloudlet policies configured for your account.
Cloudlets are small, value-added applications which solve specific business challenges.

Type Filter

Production (4)						
m.store.hp.com-holiday v4	(Visitor Prioritization) USMS_VP v1		Active	prabu.manic...	3/7/2015, 5:58:26 PM	
m.store.hp.com-holiday-testing v1	(Visitor Prioritization) USMS_VP					
store.hp.com-holiday v10	(Visitor Prioritization) USHHO_VP v1		Active	prabu.manic...	3/7/2015, 3:55:34 PM	
store.hp.com-holiday-testing v13	(Visitor Prioritization) TestVPPolicy v1		Active	chris.monciv...	3/5/2015, 11:23:53 PM	

Here, you see the store.hp.com-holiday v10 (**Estore**) & m.store.hp.com-holiday v4 (**mstore**)

Estore:

Click the Edit on **store.hp.com-holiday v10** -> **change the value to 11(Eleven)**

store.hp.com-holiday v10	(Visitor Prioritization) USHHO_VP v	1	Activate
		1	Cancel
store.hp.com-holiday-testing v13	(Visitor Prioritization) TestVPPolicy v	2	
		3	
		4	
		5	
		6	
		7	
		8	
		9	
		10	
		11	

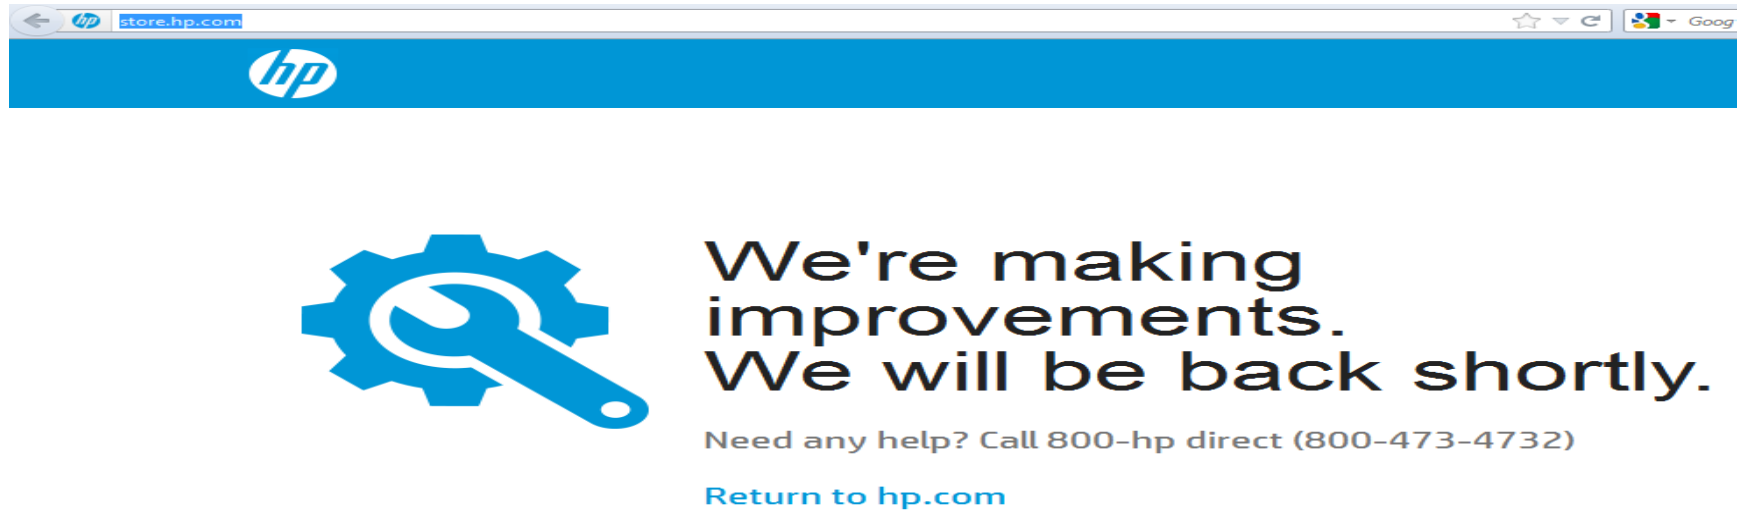

mstore:

Click the Edit on **m.store.hp.com-holiday v4** -> **change the value to 2(Two)**

Production (4)						
m.store.hp.com-holiday v4	(Visitor Prioritization) USMS_VP v	2	Activate			
		1	Cancel			
		2				
m.store.hp.com-holiday-testing v1	(Visitor Prioritization) USMS_VP	3				
		4				
		5				
store.hp.com-holiday v10	(Visitor Prioritization) USHHO_VP	6		Active	prabu.manic...	3/7/2015, 3:55:34 PM
		7				
store.hp.com-holiday-testing v13	(Visitor Prioritization) TestVPPolicy v1			Active	chris.monciv...	3/5/2015, 11:23:53 PM

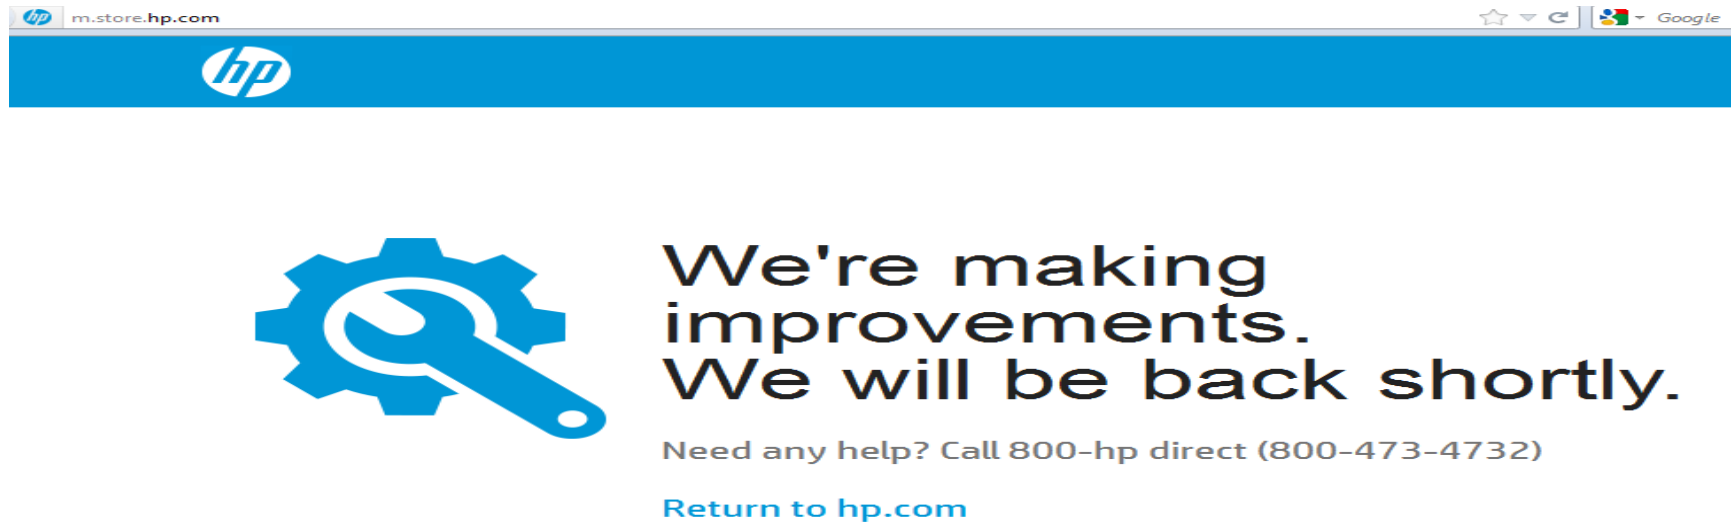

Once you done the above said, the maintenance page will enable (like below)

Estore:

The screenshot shows a web browser window with the address bar displaying "store.hp.com". The page features a blue header with the HP logo. The main content area has a white background with a blue gear and wrench icon on the left. To the right of the icon, the text reads: "We're making improvements. We will be back shortly." Below this, it says "Need any help? Call 800-hp direct (800-473-4732)" and "Return to hp.com" in blue text.

Mstore:

The screenshot shows a mobile browser window with the address bar displaying "m.store.hp.com". The page features a blue header with the HP logo. The main content area has a white background with a blue gear and wrench icon on the left. To the right of the icon, the text reads: "We're making improvements. We will be back shortly." Below this, it says "Need any help? Call 800-hp direct (800-473-4732)" and "Return to hp.com" in blue text.

#####

Step 6: Deployment: (Examples given for Prod Environment)

A) WCS:

Build Packages given in Release notes:

Application	Build Number	APAR	Query	Pre Deployment Instructions	Post Deployment Instructions
WCS (Estore)	wcs_t_r46090_02Feb2015_R3.2.0_218	✓	✓	✓	✓
WCS (Mstore)	wcs_t_r46090_02Feb2015_R3.2.0_218	×	×	×	×
DLP	wcs_t_r46090_02Feb2015_R3.2.0_218	×	✓	×	×
WESB	wesb_t_r45534_27Jan2015_code3.0_5.ear	×	×	×	✓
TIBCO	TIBCO_ETR3.2.0_01272015	×	×	×	×
OMS and Call Center	OMS_SIT3_r45955_02FEB2015_RTRUNK_691 CDT: HP-ETR3.2.0-CDT-31-JAN-2015.zip	×	×	✓	✓
CTO Configurator	Configurator_t_r46066_02Feb2015_code3.0	×	×	×	×
CTO Visual Modeler	Build / tag is not required since we have not done any changes on VM	×	×	×	×

WCS Backup server: <http://c0004134.itcs.hp.com:8080/wcs>

Give Ctrl+F → give a build number and please verify once the build is available in backup server. If it is not available, please check with Leads. Once available, Start deployment

Jenkins: <http://c0006107.itcs.hp.com:8080/jenkins/>

1. Set Build Number
2. Deploy in Respective Environment

1. Set Build Number:

Click Set build number in Jenkins

Jenkins ▸

 [People](#)

 [Build History](#)

 [My Views](#)

Build Queue

No builds in the queue.

Build Executor Status

#	Status
1	Idle
2	Idle

All

S	W	Name ↓	Last Success
		Deploy HOTFIX	2 days 1 hr - #172
		Deploy HOTFIX STG	5 mo 3 days - #200
		Deploy PROD	12 days - #75
		Deploy PROD STG	13 days - #110
		Deploy PRODROW	7 mo 0 days - #11
		Deploy PRODROWSTG	7 mo 0 days - #28
		Indexing	14 hr - #119
		Set BuildNumber	1 day 22 hr - #838

Click Build with Parameters

Jenkins ▸ Set BuildNumber ▸

 [Back to Dashboard](#)

 [Status](#)

 [Changes](#)

 [Workspace](#)

 [Build with Parameters](#)

 [Delete Project](#)

 [Configure](#)

 [Job Config History](#)

Paste the Build Number and click Build

This build requires parameters:

BUILD_NAME

Build

Click on Console output to view status of Set Build number:

Console Output

```
Started by user Moulidharan C
Building in workspace /opt/mount/JENKINS_HOME/workspace/Set BuildNumber
[Set BuildNumber] $ /bin/sh -xe /opt/mount/apache-tomcat-7.0.10/temp/hudson3526141530445174611.sh
+ echo wcs_t_r47846_23Feb2015_R3.3.0_227
+ cat /opt/mount/deploy/Deploy_package.properties
wcs_t_r47846_23Feb2015_R3.3.0_227
Finished: SUCCESS
```

2. Deploy in Respective Environment

Once the Set Build Number is Success, Please choose the environment to deploy (for Ex: Prod Live)

Click on the Deploy Prod (for Prod Live)

S	W	Name ↓	Last Success
		Deploy HOTFIX	2 days 1 hr - #172
		Deploy HOTFIX STG	5 mo 3 days - #200
		Deploy PROD ▼	12 days - #75
		Deploy PROD STG	13 days - #110

Click Configure:

-
-  [Back to Dashboard](#)
 -  [Status](#)
 -  [Changes](#)
 -  [Build Now](#)
 -  [Configure](#)
 -  [Job Config History](#)
 -  [Email Template Testing](#)

Where you can see the Execute shell box:

Execute shell

Command

```
cd /opt/mount/deploy
BUILD_NUMBER=`cat Deploy_package.properties`

/home/wcsuser/util/UpdateBuildNumberToSan.sh PROD $BUILD_NUMBER

BUILD_PACKAGE=$BUILD_NUMBER.zip
echo $BUILD_PACKAGE
rm -rf $BUILD_NUMBER
wget -q -nv http://c0004134.itsc.hp.com:8080/wcs/$BUILD_PACKAGE
mv /opt/mount/IBM/WebSphere/CommerceServer70/wc.ear.ext/oracle/loader/dbconnect_PROD.zip /opt/mount/IBM/WebSphere
/CommerceServer70/wc.ear.ext/oracle/loader/dbconnect.zip
mv /opt/mount/IBM/WebSphere/CommerceServer70/properties/OracleConnectionCustomizer_PROD.properties /opt/mount
/IBM/WebSphere/CommerceServer70/properties/OracleConnectionCustomizer.properties
unzip -qq $BUILD_PACKAGE
cd $BUILD_NUMBER
chmod 750 wcbd-ant
./wcbd-ant -buildfile wcbd-deploy.xml -Dtarget.env=PROD -Ddelta.deploy=false -Drun.data.load.acp.common=true
-Drun.mail.success=false -Drun.mail.failure=false
cd /opt/mount/deploy
rm -rf $BUILD_NUMBER
mv /opt/mount/IBM/WebSphere/CommerceServer70/wc.ear.ext/oracle/loader/dbconnect_PROD.zip /opt/mount/IBM/WebSphere
/CommerceServer70/wc.ear.ext/oracle/loader/dbconnect_PROD.zip
mv /opt/mount/IBM/WebSphere/CommerceServer70/properties/OracleConnectionCustomizer_PROD.properties /opt/mount/IBM/WebSphere
/CommerceServer70/properties/OracleConnectionCustomizer_PROD.properties
```

See [the list of available environment variables](#)

Delete

Need to check for few things here:

- Wget , remove (rm), Move (mv) commands **should not** Commented
- After -Dtarget -> the environment name mentioned should be (the Environment where you are going to Deploy- eg: env=Prod)
- After checking give Build Now → Console Output to view the deploying status.

#####

B) WESB:

WESB is only for Live Environment

Follow the same steps (said above for WCS) to deploy WESB

Backup Server: <http://c0004134.itcs.hp.com:8080/wesb>

Jenkins: <http://c0004975.itcs.hp.com:8080/jenkins>

Set Build Number

All			
S	W	Name ↓	Last Success
		Deploy HOTFIX	2 days 2 hr - #32
		Deploy Prod	1 mo 1 day - #32
		Deploy ROW	7 mo 0 days - #9
		Set Build Number	1 day 22 hr - #141

Icon: S M I

Place a WESB Build package name (.ear) and give Build. View Console Output for the completion status

This build requires parameters:

EAR_FILE_NAME

Please give the whole file name including .ear

Deploy in Respective Environment

Once the Set Build Number is Success, Please choose the environment to deploy

Click on the Deploy Prod (for Prod Live) and click configure (It looks likes below – Target ghost is 4190 wesb box)

Execute shell

```
Command #sh /opt/mount/ShellScripts/deploy_start.sh $RedMine_ID

echo "Undeploy and Deploying the Application...."
EAR_DIR=/opt/mount/deploy
cd ${EAR_DIR}
EAR_FILE_NAME=`cat BUILD_Package.properties`
TARGET_HOST=g1t4190.austin.hp.com
TARGET_PORT=8879
wget http://c0004134.its.hp.com:8080/builds/WESB/${EAR_FILE_NAME}

/opt/mount/IBM/WebSphere/AppServer/bin/wsadmin.sh -lang jython -f /home/wcsuser/wesbscript/all.py
${EAR_DIR}/${EAR_FILE_NAME} http://g1t1477g.austin.hp.com/SIXBeanXapiJaxWS/HPServicesBeansService -conntype SOAP -host
${TARGET_HOST} -port ${TARGET_PORT} -user configadmin -password Ecommerce123

cd /home/wcsuser/util
./UpdateBuildNumberToSan.sh PROD ${EAR_FILE_NAME}
cd -

rm ${EAR_FILE_NAME}
```

[See the list of available environment variables](#)

Click on Build now and view console output for the progress of WESB Deployment.

Check : saved app, error, exception.

#####

C) CTO:

CONFIGURATOR BUILD AND DEPLOYMENT (for Both Stage and Live):

This need to be done in Putty box:

1. Open CTO Build box -c0004995.itcs.hp.com

2. cd /opt/apps/IBM/scripts/

3. Run the following commands

```
ll
cd init.sh
vi init.sh
```

4. For Ex: The Given CTO Build is ***Configurator_t_r46066_02Feb2015_code3.0***

Change svn branch= ***code3.0*** and svn_tag= ***Configurator_t_r46066_02Feb2015_code3.0*** in inti.sh and save.

```

# Enter the SVN properties.
#####

SVN_USER_NAME=HP_ECOM_JenkinsSVNBuild_Usr
SVN_USER_PASSWORD=P@ssword2013!
SVN_CHECKOUT_FOLDER=/opt/apps/IBM/SVN
SVN_URL=https://csvnaus-pro.austin.hp.com:18180/svn/hpit200536glblecomtrans/ECOMMERCE_TRA
SVN_BRANCH=code3.0
SVN_TAG=Configurator_t_r47801_23Feb2015_code3.0
TAG_ENV=("dev04","dev03","dev07","dev06","dev13","sit04")
#####
#Enter the LOG File Location.
#####
LOG_LOCATION=/opt/apps/IBM/logs
~
~
~

```

Run the below Scripts (if there is no static content move – **check with Leads**)

5. Run the ./build Configurator.sh (Envname) under same path → Env Name is (prd →stage & lprd → Live)

Approx time taken: 20 mins

Monitor logs:

```

-rw-r--r-- 1 wcsuser wcsgroup 890615 Mar 10 12:34 BuildConfigurator_dev13_20153-10_12-01.log
-rw-r--r-- 1 wcsuser wcsgroup 21669 Mar 10 13:29 DeployConfigurator_dev13_2015-03-10_13-13.log
[wcsuser@c0004995 logs]$ pwd
/opt/apps/IBM/logs

```

6. Run ./post Configurator.sh (appserver name) → CTO dmgr server (stage / Live)

7. Run ./deploy Configurator.sh (Envname)

Approx time taken: 20-30 mins

Monitor logs:

```
-rw-r--r-- 1 wcsuser wcsgroup 890615 Mar 10 12:34 BuildConfigurator_dev13_20153-10_12-01.log
-rw-r--r-- 1 wcsuser wcsgroup 21669 Mar 10 13:29 DeployConfigurator_dev13_2015-03-10_13-13.log
[wcsuser@c0004995 logs]$ pwd
/opt/apps/IBM/logs
```

Run the below Scripts (if there is static content move – **check with Leads**)

5. Run the ./build Configurator1.sh (Envname) under same path → Env Name is (prd → stage & lprd → Live)
6. Run ./post Configurator.sh (appserver name) → CTO dmgr server (stage / Live)
7. Run ./deploy Configurator1.sh (Envname)

Monitor logs –

Build configurator (with static) - adding: sic/swc/js/swc.min.js (deflated 75%)

Deploy configurator (with static) - Processes: Uninstall old applications, installing new Application, Restart of servers, Static Content.

Check .ear file in /opt/apps/IBM/WebSphere/ConfigAppServer/profiles/AppSrv01/installedApps/g4t5557Cell01

Check sterling application in CTO Console under Installed Application.

CTO Deployment
Validation.msg

D) VM: (only stager)

This need to be done in same Putty box like CTO:

Follow the same step upto step 3:

1. Open CTO Build box -c0004995.itcs.hp.com

2. cd /opt/apps/IBM/scripts/

3. Run the following commands

```
ll
cd init.sh
vi init.sh
```

4. Here, give the VM Build name in **svn branch** and **svn_tag** and save it.

Run the below scripts (as like step 5 – 7 in CTO)

5. Run ./ buildSViM.sh prd

6. Run ./postBuildSViM.sh *g1t4719.austin.hp.com*

7. Run ./ deploySViM.sh prd

8. Monitor logs under /opt/apps/IBM/logs

```
-rw-r--r-- 1 wcsuser wcsgroup 30114 Feb 25 08:03 BuildsViM_dev06_2015-02-25_08-02.log
-rw-r--r-- 1 wcsuser wcsgroup 1389 Feb 25 08:19 DeployVisualModeler_dev06_2015-02-25_08-19.log
```

#####

E) OMS (Live):
Error Faced:

Deleted the entries from table YFS_OBJECT_LOCK which caused duplicate key exception after taking back up of original(YFS_OBJECT_LOCK_3rdFeb). – faced issue in AMS 3.0 Mock MTP Hotfix – fixed by Elavarasi (replied to Lakkumanan)

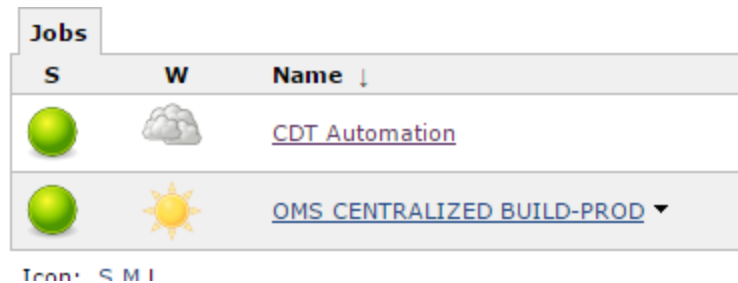

Backup Server: <http://c0004134.itcs.hp.com:8080/oms/PROD/>

Jenkins: <http://c0006109.itcs.hp.com:8080/jenkins/>

OMS possess: OMS Build+ CDT

1. OMS :

- a. Click on OMS Centralized Build-Prod

- b. Build with parameters

- c. After clicking Build with parameters, you can view this page

Project OMS CENTRALIZED BUILD-PROD

This build requires parameters:

buildEnv

HOTFIX ▾

UseLatestDevCheckout

☒

CUR_REVISION

SVN Revision Number for which Build to happen. Note that, this revision number should have been already check out for Dev build and the tar should be in SAN mount

ETR

TRUNK ▾

START_STEP

1

cleanBuild

☐

Need not be changed, unless required

UseCustomerOverrideFromTmp

☐

In case there was a build in the past with latest svn revision than current build . By default false.

RedMine_ID

This option takes the customer overrides from /tmp instead of taking from SVN. Please check with build team before using this option.

Please provide the Redmine request number corresponds to this build

Build

Here, Choose

- **builsEnv as PROD**

buildEnv
UseLatestDevCheckout
CUR_REVISION

➤ **Uncheck Use LatestDevCheckout**

UseLatestDevCheckout

- In Current Version give a revision number from the Build (for ex: OMS_SIT3_r45955_02FEB2015_RTRUNK_691 is a build , here r45955 is revision ID. Please give the number after 'r' (ie 45955) in current version):

CUR_REVISION

45955

- Choose ETR as given in Build number (OMS_SIT3_r45955_02FEB2015_RTRUNK_691)

ETR

START_STEP

TRUNK
TRUNK
ETR3.1.0
ETR3.1.1

- Start step should be always 1
- Uncheck the clean Build
- Uncheck the UseCustomerOverrideFromTop
- No need of redmine_ID

Final change looks like below:

Project OMS CENTRALIZED BUILD-PROD

This build requires parameters:

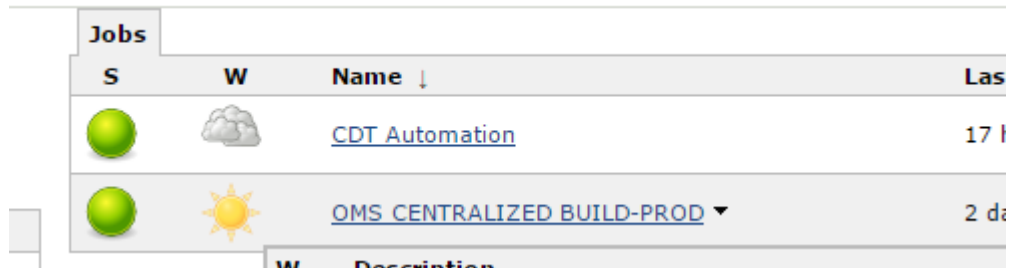

buildEnv	<div>PROD ▼</div>
UseLatestDevCheckout	<input type="checkbox"/>
CUR_REVISION	<div>45955</div>
ETR	<div>TRUNK ▼</div>
START_STEP	<div>1</div>
	<div>Need not be changed, unless required</div>
cleanBuild	<input type="checkbox"/>
	<div>In case there was a build in the past with latest svn revision than current build . By default false.</div>
UseCustomerOverrideFromTmp	<input type="checkbox"/>
	<div>This option takes the customer overrides from /tmp instead of taking from SVN. Please check with build team before using this option.</div>
RedMine_ID	<div></div>
	<div>Please provide the Redmine request number corresponds to this build</div>

Build

Click on Build now and see progression in Console output (It takes 2;30-3 Hrs to complete)

2. CDT:

- a. Open Jenkins and click CDT Automation

A screenshot of the Jenkins 'Jobs' page. It shows a table with columns for 'S' (Status), 'W' (Icon), 'Name', and 'Last Build'. Two jobs are listed: 'CDT Automation' and 'OMS CENTRALIZED BUILD-PROD'. The 'CDT Automation' job has a green status icon and a cloud icon. The 'OMS CENTRALIZED BUILD-PROD' job has a green status icon and a sun icon. The 'Name' column for the second job has a dropdown arrow.

Jobs			
S	W	Name ↓	Last Build
		CDT Automation	17 l
		OMS CENTRALIZED BUILD-PROD ▼	2 da

- b. Build with Parameter:

- c. Choose environment: For ex: Prod

Project CDT Automation

This build requires parameters:

Build_Env	PROD ▼	
CDT_Package	SIT1 DEV2 SIT2 DEV3 SIT3 HOTFIX DEV6 PROD PERF DEV1 SIT6 UT1 DEV7 SIT7 PRODROW UAT2 DEV8 DEV13 DEV4 QA2	
Destination_Agent		ame. Example: HP-ETR2.2-CDT-01-JAN-2014.zip on.hp.com ▼ destination host agent in which CDT has to be run.
RedMine_ID		edmine request number corresponds to this CDT deployment
<input type="button" value="Build"/>		

- d. Place the CDT package name and select the destination agent as *c0007986.itsc.hp.com*

This build requires parameters:

Build_Env

CDT_Package

Enter the CDT file name. Example: HP-ETR2.2-CDT-01-JAN-2014.zip

Destination_Agent

agent in which CDT has to be run.

RedMine_ID

number corresponds to this CDT deployment

- e. Click on Build & navigate to console output for CDT completion progress.

#####

Step 7: Maintenance page Disable:

Change the estore and mstore values to **1 (one)**

store.hp.com-holiday v10	(Visitor Prioritization) USHHO_VP v	1 ▼	Activate
store.hp.com-holiday-testing v13	(Visitor Prioritization) TestVPPolicy v	1	Cancel
Staging (5)		2	
		3

Step 9: Hotfix Patches (if any):

Please do the hotfix patches in respective environment (if any), using hotfix scripts and restart the servers (once have approval)

While doing manually, Please backup the file name using mv command and the bckp extension before the file type (.js , .sh, .css)

Ex:

For CheckoutHelper.js

Take backup as CheckoutHelper_latest_03122015(anyextension).js

Not as CheckoutHelper.js_ latest_03122015(anyextension)

Step 10: QA signoff

After all these processes, we give a site to QA signoff.
